Luxury Pillow Top—Instantly creates a soft, plush feel

Because people have different comfort preferences, we take a modular approach to design. Our free-floating Pillow Top is a case in point. It's plush, lofty, and cushy. If you love a luxurious, soft, cozy feel, you'll want to add our Pillow Top to your mattress.

The Advantages of our Pillow Top Design

Our Pillow Top is an independent component. It can be added to your mattress after purchase should you find you want more soft support. It can be removed if you want to change the feel. And it can be replaced when it is worn out.

Many consumers have had negative experiences with expensive "pillow top mattresses" that sag well before expected. Those mattresses use poor quality polyurethane foam, effectively degrading the durability of the mattress. Our Pillow Top features durable natural Talalay latex cushioning that wears well over time—and independently from your mattress.

The Pillow Top cover is made of stretch-knit cotton and a generous fill of Merino wool. Along with the latex core, these materials create exceptional elasticity and a plush feel. They also offer breathability and moisture dissipation for better body temperature regulation. And like all our components, the materials are chemical-free and Oeko-Tex certified.

Pillow Top Features

- Optional and Removable: Flexibility of use
- Replaceable: Wear does not affect mattress
- Adds loft to mattress surface: Provides soft support
- Natural Talalay latex core: Wears well over time
- Breathable wool fill: Won't trap moisture or "sleep hot"
- Stretch-knit cotton cover: Eliminates surface tension
